

Page 1: Homepage

The Homepage should roughly mirror the structure of the [Monster.com](#) site (see attached images) but will also diverge in important ways.

Banner:

On the far right, buttons for Sign up and Log in that would disappear once logged in. Log in should occur with Dynamic login as it occurs now.

On the far right, there should also be a link to the employer login, e.g “Employers/ Post job →”. This logic of making it primarily a job search site with a smaller link for employers will replace the current landing page with two cards, e.g. “I am a Worker”, “I’m an Employer.”

Across the top, there will be four links/tabs in the Nav Bar: Home, Job Search, Job Tracker, My Profile, Support Center (instead of what is shown in the image below, e.g. Find Jobs, Salary Tools, etc.)

Then two divs, which we already have at ([lucidledger.co/employeeDashboard](#)). But let’s amend the text of the cards as we have below. Let’s make the cards a tad bit smaller and more uniform (it looks like maybe the second row of cards is taller than the first) and shift the search bar up a bit so that it is featured more prominently on the site. It shouldn’t be bunched together but the user should also be able to see the search feature when landing on a laptop.

First div:

Your Gateway to New Opportunities [large text]

Find fair work. Get paid on time. Stay safe and protected. [medium text]

- **Find Jobs Without Middlemen**
Browse real job offers. No fees, no agents, no scams.
- **Clear Rules, Fair Contracts**
Know how much you’ll earn, when you’ll be paid, and what’s expected.
- **Secure Your Pay**
Your wages are locked in a safe account until the work is done.
- **Grow Your Reputation**
Good work helps you build a trusted record.
- **Speak Up Safely**
Share feedback or report problems without fear.
- **Start Your Journey**
Join other workers who have found better opportunities on our platform

Second div:

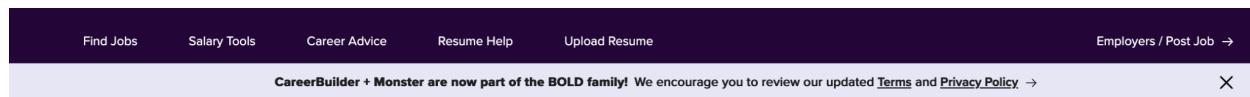

Job search tool as shown in the pic below:

Find your **next job**.

[Search jobs, keywords, companies] [Text input] [button/search icon]

Popular searches:

Series of boxes with different options.

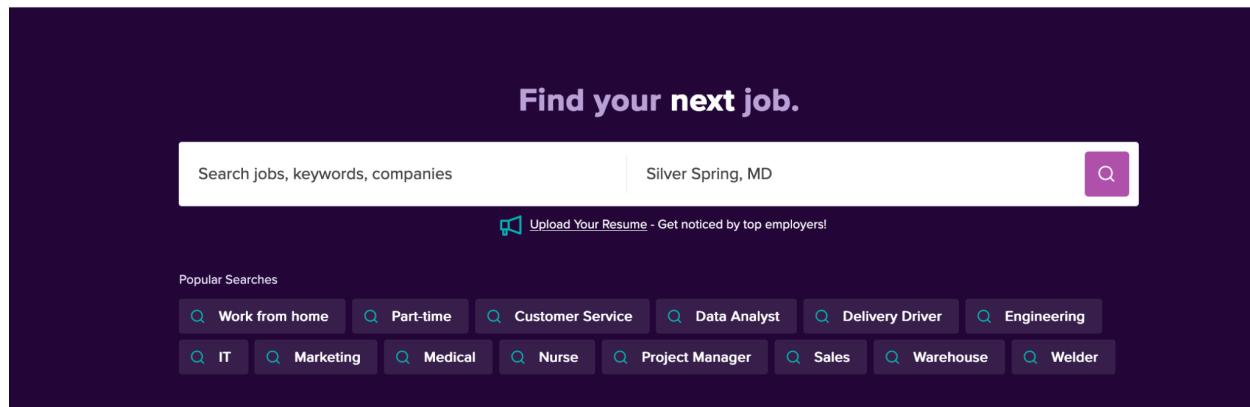

Your LAUNCHPAD to What's Next

Start strong, stay confident—this is your space to grow and land your best-fit job.

- Practice with **AI Interview Prep** that gets you ready for the real thing.
- Get **Smart Feedback** on your resume *before you apply*—because you deserve your best shot.
- Track **Every Job you Apply to**, even from other sites, all in one spot.
- Boost your chances with handpicked job recs and let recruiters come to you.

[View My Dashboard](#)

Upon clicking search, search database and return results, goes to a page with results.

We have found jobs that could be a good fit for you! [large text]

This could be laid out in multiple ways. The simplest might be a grid of cards like you see below with job information, each of which has a button that says **Apply**.

Let's also change the route from employeeDahsboard to employee-dashboard while we are at it.

Page 2: Search for Jobs

This is the job search page that is linked off of the home page from the searchbar featured at the bottom of the home page and via the Job Search link in the navbar across the top of the home page. Currently, we have something like this under lucidledger.co/employee-jobs via the "All jobs" tab.

The screenshot shows the Monster.com website interface. At the top, there is a dark header with the Monster logo, a search bar containing 'Consultant', a location dropdown set to 'Germantown, Maryland', and a magnifying glass icon. Below the header, there are navigation links for 'Find Jobs', 'Salary Tools', 'Career Advice', 'Resume Help', 'Upload Resume', and 'Employers / Post Job'. The main content area displays search results for 'Consultant Jobs in Germantown, Maryland'. The results are filtered by 'Remote' (selected), 'All Dates' (selected), and 'Within 20 Miles'. There are four job listings shown:

- Corporate Online Sales Consultant** (Virginia)
DRB Group
Ashburn, VA • 2 days ago
Full-time Employee
Apply
- Outside Sales Rep - Graphics Solutions Consultant**
ARC Document Solutions
Columbia, MD • 2 days ago
Apply
- Senior Delivery Consultant - Cloud Infrastructure Architect, WWPS ProServe**
Amazon Web Services, Inc.
Arlington, VA • Today
\$138,200 Per Year
Apply
- Sr. Delivery Consultant - Application Development, WWPS ProServe**
Amazon Web Services, Inc.
Herndon, VA • Today
\$138,200 Per Year
Apply

A central callout box on the right side of the results area says 'We have found jobs that could be the right fit' with a note 'Your results are listed on the left'.

Which looks like this:

The screenshot shows a web application for job listings. At the top, there's a dark blue header with the logo 'LUCID LEDGER' featuring a handshake icon. The header includes navigation links: Home, All Jobs (which is the active tab), My Profile, Support Center, and Log out. Below the header is a 'Job Listings' section with tabs for All Jobs, Saved, Applied (which is selected and highlighted in orange), and Results. There are two job postings listed:

- Longshore Fisherman** (Accepted, active)
Teitelbaum Industries
📍 Germantown, Maryland, United States
JPY 20.00/per day
Posted: Not specified
- Crane Operator** (Accepted, closed)
Teitelbaum Industries
📍 Germantown, Maryland, United States
USD 25.00/hourly
Posted: Not specified

On the right side of the page, there's a detailed view of a specific job listing for a Longshore Fisherman:

- Job Summary**: here is a brief summary of the job.....
- Responsibilities**:
 - know how to use a fishing rod
 - not get too seasick
- Required Skills**: Good sealegs
- About the Company**: This is a great new fishing company looking to get into many industries.

A large green button at the bottom right says 'Sign Contract'. Below it, a note says 'Posted on Not specified'.

I want to change a few key things. First, I want to change Results to Offers, where the employer's offers will go. These will be jobs/contracts that are offered to workers and are awaiting their signatures.

Second I want to incorporate the search feature that we see on the homepage and like on the [Monster.com](#) job search page.

Finally, it should be referred to as Job Search rather than All Jobs in the navbar on the home page and the route should be changed to job-search as well.

Page 3: Job Tracker

The main purpose of this page is going to be to keep track of jobs once the worker has signed a contract. This page should contain four divs: welcome; contracts; reputation; disputes. It currently has no implementation on the site.

Job Tracker [large text]

First div:

Welcome to your Work Tracker

Keep track of every step — from finding a job to getting paid.

- **Track Your Contracts**

View jobs you've applied for, those in progress, and contracts you've completed.

- **Check Your Status**

See the stage of each job and stay on top of next steps.

- **Build Your Reputation**

See your reputation score grow as you complete work — earn trust and better jobs.

Search for Jobs [button that links to search page pasted above]

The screenshot shows a dark-themed web application interface. At the top, there's a navigation bar with links: Find Jobs, Salary Tools, Career Advice, Resume Help, Upload Resume, and Employers / Post Job. Below the navigation is a secondary navigation bar with icons for Home, Dashboard, My Profile, Skill Tools, Job Tracker (which is highlighted in blue), Job Alerts, Recommended Jobs, and Settings. The main content area has a light gray background. It features a purple header "Job Tracker". Below it is a purple box containing a small icon of a resume and the text "Welcome to Job Tracker". It says: "It's now easier to keep track of jobs and stay organized." followed by a bulleted list: "View and track the status of your jobs", "Find tips and advice to help you in your search", "Record personal notes on each job", and "Access full job descriptions to reference later". A "Search For Jobs" button is located below this section. Further down is another purple box titled "Add Job Listings". It says: "Add job listings from another job board or site to keep track of everything in one place." and contains a "Add External Job Listing" button.

Second div:

Should be titled “Contracts” and should have two tabs: Open Contracts and Completed Contracts

Open Contracts

List of currently held positions and open/pending contracts along with information regarding the details of the contract and how much of the contract has been paid so far.

Completed Contracts

List of completed contracts, details regarding the terms of the contract and the amount earned from the contract.

Third div:

Reputation score. Should have reputation score based on Lucid ledger scoring system (can leave blank or placeholder with “Coming Soon” for now)

Fourth div:

Disputes. Information regarding any ongoing disputes and the status of the dispute (can leave blank or placeholder with “Coming Soon” for now)

Page 4: My Profile

This part is largely implemented under the route employee-profile, however, when I add job experience I do not see it listed anywhere. We should have functionality whereby when a new skill is entered, it is added to a resume or bio in a new section of the page below Skills and Work experience.. It should also be featured in the applications when a worker applies for a job.

Contact information, location:

The image shows a mobile application screen with two main sections: 'Contact Information' and 'Location'. The 'Contact Information' section contains the name 'Emmanuel Teitelbaum', the email 'manny.teitelbaum@gmail.com', and the phone number '+13013566272'. The 'Location' section contains the address 'Germantown, Maryland 20874' and the country 'United States'. Each section has a small blue pencil icon in the top right corner, indicating editability.

Skills:

1. The worker taps into a field that says “Add a skill”.
2. They see suggestions like “Fishing”, “Driving”, “Harvesting”, etc.
3. They can select from the list or type a new skill manually.
4. Selected skills appear as pills/tags with an “x” to remove them.
5. Their skills are saved to the profile on submit or in real-time.

Work Experience:

Job 1: List of Jobs [text box/createable select] ; Start Date [Date field] - End Date [Date field]

Job 2: List of Jobs [text box/createable select] ; Start Date [Date field] - End Date [Date field]

Job 3:

etc.

Here is what the current implementation looks like:

The screenshot shows a user profile for Emmanuel Teitelbaum, an employee. The profile includes a placeholder profile picture, the name "Emmanuel Teitelbaum", and the title "Employee".

Contact Information

- Email: manny.teitelbaum@gmail.com
- Phone: —

Address

- Address: 13101 Rosebay Dr., Apt. #3
- City / State: Germantown, Maryland
- Postal Code: 20874
- Country: United States

Skills

Add a skill: fishing

Work Experience

Job Title	Start Date	End Date
Farmhand	14/2001	15/2003

+ Add Job Save Experience

Work experience saved

Page 5: Support Center

This page is linked but is currently blank.

Page Title: "Get Help with a Job"

Subtitle: "If something isn't right, choose the job and tell us what happened."

List of Active and Recent Contracts

- Pull from the worker's contract history (e.g. last 30 or 60 days).
- Each item includes:
 - Job name (or employer name)
 - Status (Active / Completed)

- Date range
- “Report a Problem” button next to each

Report Form (Opens When Button Clicked)

- Fields:
 - Short category list (e.g. No payment · Long hours · Unsafe work · Harassment · Other)
 - Text area: “What happened?”
 - Optional file upload (photo or screenshot)
 - (Optional) Anonymous toggle: “Send without name?”

Status Confirmation / History

- After submitting, show:
 - “Your report has been received. We’ll review and follow up.”
 - Option to see a list of past reports + status (if feasible later)

Additional Components (for future development)

- Searchable profiles for workers (useful for skilled workers)
- Ability for workers to set location and job preferences
- Job recommender system
- Notifications/alerts about new jobs
